# LCD Hour Meter – R8866

### **Specifications**

#### R8866

Operating range	99,999.9
Start time	2 seconds
Display	Time Symbol flashes once a second and counts time.
Accuracy	±0.02%
Appearance	No deformation, bubble, flaw or unevenness. Clear lens, well joint.
Operating voltage range	DC9-60V; DC10-80V
Operating temperature range	-40℃ to + 85℃
Material	Case: ABS; Lens: PC
Terminals	3/16" faston; Max. 4 pins (optional)
Insulation	Resistance between electriferous parts and outside case is over 100MΩ
LCD Hour meter pass the followi	ng test:
Humidity and high temperature	48 hours test at 55°C Humidity varies from 60% to 95% RH
Alter temperature	Put hour meter in -40 °C frig for 2 hours and place it in normal temperature for 2-3 minutes, and then put it in 65 °C chamber for 2 hours, and place it in normal temperature for 2-3 minutes again. Repeat the above steps for 5 times and put the hour meter in normal temperature, pressure
	and humidity for 4 hours, and its operating precision is within 0.1%.
Vibration	According to JB/T7307-94, Item 3.6.3 regulations, test hour meter under vibration at set and swept frequency. After test place meter in normal conditions for 4 hours and its operating precision is within 0.1%.
Shock	According to JB/T7307-94, form-7 regulations, test hour meter in mechanical shock chamber. After test its operating precision is within 0.1%.
Seal	Put hour meter in -30 $^{\circ}$ C frig for 2 hours and place it in normal temperature for 2-3 minutes and place the hour meter in 85 $^{\circ}$ C water at the depth of 15cm, and find no air bubble.
Salt fog	16 hours salt fog test, instrument works well.
EMC test	Test have been carried out on a sample R8866B in accordance with ISO13766-2006; Electromagnetic emission radiated from construction machinery without exceed reference limits; Immunity of construction machinery to electromagnetic radiation and BCI without sensitive phenomena. During the conducted transients, sensitive phenomena is found and can recover normally.

## LCD Hour Meter – R8866

#### **Optional Functions**

#### R8866-2P

- 2 pins Hour meter: Hours can't be reset
- + operating voltage (via ignition switch)
- common ground

Hour meter shows accumulated hours and counts time as ignition switch turned on.

3 pins Hour meter: Hours can't be reset

- + operating voltag
- common ground
- $\rightarrow$  hour meter shows accumulated hours but not counts time.
- C signal input, to engine W
- $\rightarrow$  Turn on the key enables counting, and time icon flashes @ 1 Hz
- 4 pins Hour meter: Resetable
- + operating voltage
- common ground
- $\rightarrow$  hour meter shows accumulated hours but not counts time.
- C signal input, to engine W
- $\rightarrow$  Turn on the key enables counting, and time icon flashes @ 1 Hz

R reset  $\rightarrow$  Connect to ground for 2 seconds, hour meter resets.
